# Submission guidelines for data analysis course

## General guidelines
Submission:

1. Exercises should be done and submitted in pairs.

2. Only one of the students in the pair is required to submit the .pdf/.rmd file with the answers for both the theoretical and practical parts of the exercise. Unless said otherwise, we expect to get a pdf or an .rmd file. If there are multiple files – submit a zip file that contains those .rmd/pdf files

3. filenames should be student_id1_ student_id2.suffix . for example:  **204204288_204204289.Rmd**
Filenames for solo submissions format- id1.suffix for example **204204289.Rmd**
4.  The names and IDs of both students should be written at the top of each page in the exercise.
5. If there are graphs in the homework – we expect them to be attached to the solution.
6. Language accepted – **English**
7. Make sure your code works and is "knittable", and attach a knitted version of your code (either html or pdf).

Theoretical parts:
- The theoretical part should be either typed or written by hand in a **readable** fashion (can be attached in the .pdf file)

## Practical clarification for HW2:
As we mentioned, submit an .rmd file and a knitted version of it.
